

**NetSTAR, Inc., the global OEM Web Categorization, Threat Intelligence and WebApp Categorization leader, to participate at Mobile World Congress' NEXTech Lab 2017**

Barcelona, Spain. – February 15, 2017 – NetSTAR, the recognized global leader in OEM Web categorization, Threat Intelligence, Web App categorization, and Mobile App categorization; is proud to announce it will participate at Mobile World Congress 2017 and the NEXTech Lab in Barcelona.

As part of NetSTAR's participation at Mobile World Congress, the company will be announcing a new technology that will be available to Operators and solution providers for the Telco space as another OEM solution in the company's product-line. In addition, NetSTAR will be supporting several OEM partners who are exhibiting at MWC and have incorporate one or more of NetSTAR's technologies in their product/solution set(s). NetSTAR will also be presenting two sessions at the conference; one focused primarily for the AdTech and analytic segments of the market, the other focused on "next generation" Web categorization and threat intelligence.

NEXTech is the exciting, innovative exhibition in Hall 8 containing forward-thinking companies with the latest technology in the mobile world. With over 250 OEM partners, representing over 800,000,000 subscribers and endpoints, in the telco, networking, security, AdTech, and big data analytic markets, these companies use NetSTAR technology for policy management, security, fraud prevention, and analytics. NetSTAR is the recognized global leader in OEM URL categorization, Threat Intelligence, Web App categorization, and Mobile App categorization, NetSTAR will bring valuable insight to the conference with their presentations.

For those attending Mobile World Congress and wanting to learn more about how NetSTAR can help provide Web categorization, threat intelligence, MobileApp categorization, and/or WebApp categorization technology to be integrated into their products and solutions, NetSTAR will have several executives available for one-on-one discusses. Those interested can schedule a meeting by filling out a contact form at [www.incompass.netstar-inc.com/contact-us](http://www.incompass.netstar-inc.com/contact-us).
